

West Wiltshire Crematorium, Trowbridge

Teasdale
Environmental Design

Designed on behalf of: PRC Construction Ltd
Client: Crematoria Management Ltd
Project dates: 1995

A comprehensive landscape scheme was considered fundamental to the successful development of a new crematorium on a 4-hectare green field site.

Around the main complex of the crematorium buildings, formal gardens were designed to provide year round colour and interest.

Over the wider landscape of the site, planting and earthworks were arranged to soften the appearance of the buildings and, in particular, the car parks and create a framework for memorial gardens. These gardens will continue to be developed over the lifetime of the crematorium.
